Local Presence, National Reach

A wholly owned subsidiary of EMCOR Group, Inc., Viox combines the personal attention of a hometown contractor with the problem-solving resources and expertise of a national firm. Backed by 60 years of experience, we offer high-quality construction, electrical, plumbing, and HVAC services, as well as custom casework, complete grounds maintenance, and integrated facilities management, all coordinated to maximize customer value. To this, we add EMCOR's financial strength, worldwide knowledge transfer network, and broad range of cross-industry solutions that effectively address today's most significant facilities challenges. The result is a one-stop solution for a full range of facilities needs.

Your single source for electrical services that support your business instead of draining your bottom line

As a single-source provider of expert electrical services, Viox can help you design, install, and maintain a full range of today's most energy efficient and technologically advanced electrical systems. Whether it's a retrofit, renovation, or new construction project, our consistent quality, highly trained technicians, and professional project management enable us to deliver complete electrical installations and ongoing maintenance that support your business instead of draining your bottom line.

Our electrical services include:

- AC/DC power systems
- Alternative power solutions
- Complete electrical power distribution systems
- Customized maintenance programs
- Data, communication, and cable tray installation
- Electrical plant & lighting systems
- Emergency power generators/uninterruptible power supply (UPS) systems
- Explosion-proof systems
- Fire alarm systems
- Grounding & cathodic protection systems
- Infrared imaging & vibration analysis
- Life safety electrical equipment & device installation
- Motor control & variable speed drive systems
- Network design, installation & integration services
- Paging, nurse call, sound & audio/visual systems
- Primary & standby power generation
- Programmable logic controls (PLC) installation and programming
- Raceway and conductor overhead & underground installation
- Riser management
- Security systems, including closed-circuit TV (CCTV) & card access systems
- Site utilities
- 24/7/365 emergency service

Think end-to-end services

Expert management that meets your most exacting standards, your most rigid specifications

From pre-construction meetings through project completion, our experienced project managers provide responsive, attentive, and knowledgeable project oversight. Right from the start, they work with you and your authorized personnel to thoroughly understand your project and its objectives. Then, using the Viox Project Control System, they maintain ongoing communications, continuously track work progress and budget details, and ensure the highest standards of safety and quality.

To ensure consistently high-quality client service, our electrical technicians undergo continuous training on a wide range of topics. In addition to the IEC four-year apprenticeship program, they take courses in OSHA Safety (10 hour and 30 hour), code updates, and thermography/data collection procedures. By combining this training with our extensive video/book training library, we help ensure high-performance project delivery using today's highest quality processes, procedures, and technologies.

Our project management capabilities include:

- A commitment to meeting scheduling and budget criteria
- A single point of contact for managing all project activities
- Experienced professionals to oversee safe and proper project completion
- Ongoing budget and schedule monitoring
- Continuous cost control
- The confidence you need to let us handle your project, while you concentrate on your core business and its success

Design/build: Excellence that exceeds expectations

Viox's design/build and value engineering capabilities, combined with our in-house computer-assisted design (CAD) resources, help you resolve constructability issues before they become expenses. The result is high-quality design, lower project costs, and improved risk management.

WHO'S ON THE INSIDE LOOKING OUT FOR YOU?

When Viox is on the inside looking out for you, you get **creative solutions and customized care designed to meet your needs from one end of the critical path to the other**. The result is high-quality, high-performance facilities that improve your overall productivity and quality of operations, so your business can perform at a higher level.
